YUSUF BOZ

SOFTWARE ENGINEER

ABOUT ME

My first acquaintance with software development started when I joined the Aviation and Space Club in high school. I developed numerous projects and participated in competitions with my team. Since then, I've been continuously developing projects and improving myself to become a skilled software engineer.

I am maintaining my software development journey with a focus on backend development. I am dedicated to writing clean, maintainable code and strictly adhering to SOLID principles to ensure the quality and sustainability of my work.
